## About the Workshop:

Accounting is a critical component to the success of every business. Businesses must keep track of their data in order to comply with IRS rules if they wish to avoid trouble and penalties. Business owners should also be using their accounting data to manage their business. Most business owners are experts when it comes to their product or service, but they rarely have an accounting background. To most, accounting is the most intimidating and frustrating aspect of business ownership. Do you fall into this category?

If so, let us answer your questions and take the fear out of accounting and QuickBooks. No question is too simple or too complex.

A select panel of Accounting, Bookkeeping and Tax experts will be present to answer all of your questions. We will even be able to demonstrate how-to on QuickBooks for many questions. Join us for an open discussion about Accounting and QuickBooks. Sign up now. Seating is limited.
